

“We will shortly be reaching a level of carbon dioxide beyond which we will be out of control in terms of massive climate change events.”
Professor Sir David King, Chief Scientific Adviser to the UK Government

Scientists warn that unchecked climate change could devastate our planet.

The good news is that there is something simple you can do about it right now. Start buying your electricity from clean, green sources, and you'll be helping to cut emissions of the greenhouse gases that cause global warming.

Switching to a green tariff costs little of nothing – in fact you could even save money.

What's more, if you use our free service to make the switch, you'll have **a chance to have your electricity bills paid for a whole year.***

You'll also be helping to raise money for some good causes:

Oxfam, WaterAid and the Cornwall Green Communities Fund, which supports small-scale sustainable energy projects that benefit local communities.

Find out more and switch to a green tariff online at

www.cornwall-switch.org

or call

freephone 0800 1088 333

for the latest price details of our recommended tariffs and the opportunity to switch by phone.

Recommended 'green' electricity tariffs		
Supplier/tariff	Price comparison**	% generated from renewables
Npower Juice	£1.18 monthly saving	100% offshore wind
Green Energy 10	£1.12 monthly saving 1	10% wind, hydro & solar
Ecotricity New	2p monthly saving	10% onshore wind
Good Energy	86p extra per month	100% wind & small hydro
Ecotricity Old	£1.24 extra per month	100% onshore wind
Green Energy 100	£1.29 extra per month	100% wind, hydro & solar

**Comparison based on average household on SWEB Energy's standard (non-renewable) tariff paying £260 per year by direct debit. Correct as at 25.04.05
